Professional Summary

Lead Software Development Engineer in Test (SDET) with 12+ years of experience designing, building, and scaling enterprise test automation solutions across Financial Services, SaaS, IoT, and Payments. Expert in UI, API, Integration, Performance, Shift-Left and Continuous Testing. Hands-on expertise in Java, Selenium, Playwright, REST Assured, Gatling, Spring Boot, Docker, Kubernetes, Jenkins, Azure DevOps, CI/CD and Microservices Testing. Experienced in mentoring engineers, driving automation strategy, and leveraging AI-assisted engineering using GitHub Copilot, Cursor, Claude, MCP and Prompt Engineering.

Technical Skills

- **Programming:** Java, Python (Basic), JavaScript (Basic), Scala (Basic)
 - **Automation:** Selenium WebDriver, Playwright, REST Assured, TestNG, Page Object Model (POM)
 - **API Testing:** REST APIs, Postman, Integration Testing, Microservices Testing
 - **Performance:** Gatling, API Performance Testing, Load Testing
 - **DevOps:** Docker, Kubernetes, Jenkins, Azure DevOps, Maven, Git
 - **Monitoring:** Azure Application Insights, Splunk, Grafana, SonarQube
 - **AI:** GitHub Copilot, Cursor, Claude, MCP, Prompt Engineering, Agentic AI
 - **Methodologies:** Agile Scrum, SDLC, STLC, Shift-Left Testing, Continuous Testing, CI/CD
-

Professional Experience

Lead QA SDET | MSCI | Jul 2021 - Present

- Lead Quality Engineering for the BarraOne Enterprise Risk Management Platform across Functional, UI, API, Integration, and Performance Testing.
- Spearheaded AI-assisted development workflows, introducing custom AI agents for code reviews, bug triaging, and testing — improving engineering productivity by 40% while maintaining rigorous security guardrails.
- Developed integration tests within the development repository to improve code coverage and enable earlier defect detection.
- Designed and implemented a foundational Gatling API Performance Testing Framework.

- Investigated production issues using Azure Application Insights to accelerate root-cause analysis.
- Collaborated with developers, architects, and product managers to improve automation strategy and software quality.
- Championed Shift-Left Testing practices and mentored engineers on automation best practices.

Senior QA Automation Engineer | AppDirect | Jul 2019 - Jul 2021

- Automated REST APIs using REST Assured, reducing manual regression effort.
- Refactored Selenium automation suites for improved maintainability and stability.
- Reviewed pull requests to improve functional and automation test coverage.
- Analyzed production issues using Splunk and partnered with developers for faster resolution.

Software Test Engineer | PTC Software | Jul 2018 - Jul 2019

- Performed end-to-end testing for ThingWorx Industrial IoT platform.
- Enhanced Selenium automation framework using Java.
- Maintained automated regression suites supporting continuous integration.

QA Associate | Fiserv | Jul 2016 - Jul 2018

- Designed and executed Functional, Regression, and Integration testing.
- Implemented Selenium/TestNG automation integrated with Maven and Jenkins.
- Collaborated with developers to improve automation coverage.

QA Engineer | Cybage Software | Jul 2014 - Jul 2016

- Performed Functional and Regression Testing for GlobalCollect payment platform.
- Automated regression test cases using Selenium WebDriver, Java, and TestNG.
- Improved regression efficiency through reusable automation components.

Key Achievements

- 12+ years of Software Testing and Quality Engineering experience.
- Built enterprise UI, API, Integration and Performance Automation solutions.
- Introduced API Performance Testing using Gatling.
- Strong advocate of AI-assisted software engineering workflows.

Education

Bachelor of Engineering (Computer Engineering)
D. Y. Patil College of Engineering, Pune (2014)
